

Research Stats · one-pager

Jade Zhao · zhao-langxi · 14 September 2026 · PDF handoff (no design-tool login)

Interactive board that turns **15 CV market-research stats** into how/why shipping cards across **5 themes**.
Market % = published inputs. Product KPIs and gap analysis = hers.

Shipped

- 15 cards · 5 themes (Digital Humans, Privacy, UX, Nonprofit, Restaurant)
- Every card: What · Why it matters · What to build
- Interactions: theme filters · multi-select (max 3) · cluster stepper · project lock · notes
- zhao-langxi/work/research-stats.html + js/research-stats.js

Product KPIs

KPI	Value
Layer coverage	100%
Action throughput	100%
Theme share	20% each
Inbound linking	20%
Pages live URL	404 (not deployed)

Her simulations

Analysis	Result
Adoption vs scale (72 – 5)	67 pp
Clarity deficit (100 – 20)	80 pp
Nonprofit strategy (92 – 7)	85 pp
Top priority (dh-5)	95.0

Inputs vs hers (quick)

Market inputs (not hers)	Product / analysis (hers)
72%, 5%, 20% clarity, 92%/7%, 99% vs 69% social/web ... citations only	15 cards, 100% layers, 67 pp gap analysis, priority scores with documented formula

Open locally

Next build (first)

Digital Humans: disclosure + override pattern library for a demo, plus a short “after the demo” handoff note. Driven by the 67 pp adoption-scale gap.

Shipped research board covering 15 stats across 5 themes (100% layer coverage); ran gap analysis on published inputs (72% vs 5% = 67 pp) to prioritise Digital Humans how/why work.
